THE HEALTH BRINGING RADON WATER

HEALING ENERGY FROM THE EARTH’S DEPTHS

It is a specific natural health resource that makes a certain locality a health resort. There are climatic spa resorts, spa resorts with springs of thermal mineral water, mud spa resorts etc. Léčebné lázně Jáchymov a.s. is absolutely unique and different in terms of its natural healing resource. It cure by means of radon water that, unlike other resources, does not have chemical effects, but energetic ones. A unique source of natural resources is a mine in Jáchymov, which is still functional, the oldest one in Bohemia and probably also in Europe. It arose in 1518 and there are springs of radon water on its twelfth level, at a depth of 500 m under the ground, which are called, for example, after academician František Běhounek or Marie Curie - Skłodowska.

Nowadays four springs are used on the 12th level of the Svornost mine (Concord):

</table>

A mix from all four springs is used for the baths. It contains in the bath approx. 4,5-5,5 kBq/l.

The quintessence of the treatment of diseases of the locomotive system in Jáchymov are baths in radon-rich water. Radon, radon-222 isotope respectively, is a chemically inert gas that rises from the depths of the Ore Mountains and dissolves in underground springs. It is a source of soft ionising alpha radiation. During a radon bath, the surface of the body is exposed to an energy shower of radon alpha particles. The alpha particles trigger a chain of physiological reactions, which soothes the pain, improve joint movement, blood circulation and healing, stimulate regeneration processes in the tissue of locomotive organs, harmonize vegetative functions, positively affect blood pressure, and they boost the immune system of the body. The penetration of radon into blood circulation is negligible and its biological half-life (elimination of radon from the body) is 20 minutes (i.e. the duration of the radon bath).

A radon bath helps blood supply to the bones and joints, alleviates ailments of the spine and joints, works as an antiarthritic means without side effects and can reduce pain for up to 8 - 10 months after treatment. Radon helps after injuries and operations and people with diabetes and gout. For many clients with rheumatism or Bechterew disease, radon therapy provides indescribable effects, but energetic ones. A unique source of these natural resources is a mine in Jáchymov, which is still functional, the oldest one in Bohemia and probably also in Europe. It arose in 1518 and there are springs of radon water on its twelfth level, at a depth of 500 m under the ground, which are called, for example, after academician František Běhounek or Marie Curie - Skłodowska.

RECOMMENDATIONS FOR TRIPS

Peat bogs at Boží Dar

It is the largest reservation in the western part of Bohemia, with the space covering almost one thousand hectares. It contains very rare and precious plants and animals. It is dominated by the mountain call “Božídarský Špičák”. Its height of 1115 m makes it the highest basalt hill of volcanic origin in the Central Europe.

Tolar - thaler

At the times of the greatest flourishing of silver mining, one of the most widely spread coins of Europe – the Jáchymov thaler was minted in the local royal mint. The first migrants took this coin even to America where its slightly altered form provided the name for the US currency – the dollar.

A historical border-stone dates back to the era of Maria Theresa reign. It is located on the triangle of three countries – Bohemia, Saxony and the area belonging to the Schwarzenberg nobility.

Chalet with local culinary specialties

Not far from Boží Dar in the direction of Horní Blatná, there you can find a mountain chalet „Salaš – Rýžovna“, where you can taste regional specialties made from local sources, mainly sheep and goat cheeses and fresh cow milk from animals grazing on the nearby meadows.

Klínovec

The highest hill of the Ore Mountains - Klínovec (1244 m above the sea level) belongs to the natural dominants of the Jáchymov surrounds. The 24-meter-high outlook tower boasts a rich history. The current construction is the fourth of its sort on the location. First, from 1817 there had been a simple wooden pyramid, which was replaced with an open outlook pavilion in 1838. In 1986 this gazebo burnt down. The current outlook tower was opened in 1884. Since 1893 there has been a restaurant and a hotel at the outlook tower. At present the whole complex is closed and it has been waiting for reconstruction.

Karlov Vary

A unique spa town with thermal springs and original architecture. A cultural and social center of the region.

Loket

A well-preserved historical town with a castle which is open all year round and which is home to interesting collections and exhibitions.
In the middle of a large woodland park, like a beautiful pearl necklace in green trees, an elegant five-floor building spreads out in the Viennese neo-classical style. Tradition to accommodation it offers treatment and refreshments under one roof, as well as many ways of spending your free time: a summer terrace with a view of the park, glass air-conditioned coffee bar with an extensive range of refreshments, a large social lounge, a concert hall or a period dance hall with live music.

The hotel services include a bike and ski storage, the service of a programme specialist, a swimming pool and a bathrobe and a business centre. Everything is FREE OF CHARGE.

**HOTEL ACCOMMODATION**

Accommodation with breakfast is provided in pleasantly furnished and comfortable single and double rooms.

**SPA CUISINE AT JÁCHYMÓV**

**SPA RESTAURANTS AND CAFÉS**

Gastronomy as well as treatment and accommodation are important parts of your spa stay. Alimentation quality influences significantly the health condition of each individual. We try to follow the rules of healthy and fully-fledged nutrition and we aim to meet specific requirements of our guests, such as gluten-free or macrobiotic diets. A nutrition specialist and a chef prepare an offer of particular meals for you in every spa hotel. You can ask the nutrition specialist for advice on nourishment or whatever you may be interested in in this field any time.

In the Radium Palace Hotel you can choose from 5 meals for dinner and lunch daily. Breakasts, vegetable salads, fruit and desserts are served in a buffet style.

The spa hotels Běhounek, Curie and Astorie offer full-board in a buffet style.

**RECOMMENDATION OF EXCELLENT COFFEE**

The Běhounek Hotel offers a pleasant seating in the Winter garden on the ground floor and in a café on the 5th floor which is connected with a spacious terrace. Regular dance evenings are held here.

The Radium Palace Hotel attracts guests with daily fresh desserts made in its own confectioner’s. You can savor them in the Winter garden and on the summer terrace. Live music will make your afternoon even more pleasant. You can dance in a stylish bar where 100-year-old interiors have been preserved.

In the Curie Hotel there is refreshment in a café on the 1st floor and in a lobby bar awaiting you. Popular are dance evenings, too.

**Jáchymov will help you stay young**

Luxury cosmetic rituals ALQVIMIA have been available at the Jáchymov Spa since the end of the last year. The Radium Palace Spa Hotel****, however, introduced two new types of complexion treatment in spring, which became part of Queen Cleopatra Ritual and Ritual of Joy. They aim to prevent ageing of your complexion and to soothe sensitive skin.

Queen Cleopatra’s sensual ritual of beauty and health restitutes softness, smoothness and youthful shine to the skin. It combines rejuvenating treatment of the face and aroma-therapeutic treatment of the body. A perfect experience for your senses gives every woman self-confidence and attractiveness. Absolute synergies of an aroma-therapeutic blend of essential oils revive the feelings of hope, optimism and life joy in the Ritual of joy. Revitalizing strength of fruit hydrates, regenerates and nourishes deeply the skin. It encourages self-confidence and mental peace.

And what is the novelty, face treatment like? Rejuvenating face treatment focuses on an immediate effect - regeneration, firming up and lifting. This luxury treatment applying precious aromatic oils and other rare substances perfectly lifts and consolidates the face features. The complexion is rid of symptoms of fatigue and it becomes brighter. Soothing of sensitive complexion is brought thanks to the treatment with a special aroma-therapeutic mixture with healing and soothing effects on the sensitive and irritated complexion. Highly-valued natural substances rid the skin of the feeling of dryness, itching and tension. They eliminate reddening and contribute the feeling of comfort.
On a slope overlooking the Jáchymov valley is an extensive building which cannot be overlooked on arrival in Jáchymov. It has become a favourite for its spaciousness, airiness and unique view of the surrounding Ore Mountains. It offers accommodation, food and treatment under one roof. Each room is equipped with a balcony. All clients can use also a large sun terrace and a hotel swimming pool with Kneipp-walk, of course FREE OF CHARGE. The hotel was renovated and modernized in 2009.

The Běhounek Hotel includes the adjacent buildings Dalibor, Jitřenka and Penzion M, from which one walks to the Běhounek Hotel for food and treatment. Dalibor and Jitřenka are linked to the main building by a corridor.

Luhačovice, the fourth largest and one of the most beautiful spas in the Czech Republic, is located in a picturesque valley within the protected landscape area of the White Carpathians providing an unpolluted atmosphere and favourable climatic conditions. The original architecture, designed by Slovak architect Dušan Jurkovič, has given Luhačovice Spa its unique and unrepeatable character. Today’s exclusive wellness hotel Jurkovičův dům, which is named for this architect, is a true architectural pearl. Thanks to its therapeutic springs Luhačovice is one of the leading therapeutic spas in Europe.

In addition to spa treatments, Luhačovice offers guests accommodation in a wonderful natural environment as well as opportunities for active recreation and cultural and social activities. You can visit castles, chateaux, open-air museums and other places of interest in the vicinity of Luhačovice. Spa Luhačovice is a sought-after destination by all those who wish to remain healthy, gain new energy, slow the pace of their everyday life and experience a pleasant holiday.

**NATURAL HEALING SPRINGS**

The most popular of Luhačovice’s 16 mineral springs are Vincentka, Aloiska and Ottovka. Other hydrogen-carbonate-chloride-sodium mineral springs of similar composition containing mainly sodium, calcium, magnesium, iron and carbon dioxide dissolved in a significant volume are used for spa treatment. The temperature of the mineral water at the spring varies between 10 and 14 °C. Due to its high mineral content and excellent dispersion of free carbon dioxide, the Luhačovice mineral waters are regarded among the most effective in Europe.
The spa treatment in Luhačovice takes advantage of the beneficial effects of the local mineral water and natural climatic conditions.

Healing water helps mainly in the treatment of:

- the respiratory system
- the locomotive system
- diabetes
- the digestive system
- the circulatory system
- oncological illnesses

Spa Luhačovice, a.s. is one of the profiled and primary therapeutic facilities in the Czech Republic in the field of spa treatment of the respiratory tract.

The spa treatment is based on baths in natural mineral water, inhalations and water intake. The natural treatment is supplemented with massages (classical, reflexive and underwater), water therapy, electrotherapy, magnetotherapy, oxygen therapy, kinesiotherapy and other special procedures. The spa also offers instruction in maintaining a healthy lifestyle and permanent care for your own health. It is supervised by a physician according to a prescribed individual medical program.

To get the most out of a spa treatment physicians recommend at least a three-week spa stay.

For spa stays of 21 and more days we offer an advantageous price rate Week 3+.
